

Tips & Tricks! for Simply Spray® Soft Fabric Paint

the ONLY non-toxic, non-flammable aerosol paint!

*Stays soft when dry.
Formulated for use on absorbent,
light colored fabrics.
Simply Spray Soft Fabric Paint
will not cover dark fabric.*

GENERAL INSTRUCTIONS for Simply Spray® Soft Fabric Paint:

- Prewash and dry fabric to remove sizing. Do not use fabric softener as this will affect the absorbency of your fabric.
- Protect work area with newspaper.
- Put cardboard between layers of garment to prevent paint from soaking through fabric to back.

Simply Spray is permanent!

- Shake can well before using.
- Tear off safety tab.
- To get used to the feel of the trigger, practice spraying first on scrap fabric or paper.

TIP: To avoid spatter, start your spray on a paper towel. Then, while spraying, move onto your project and continue spraying back onto the paper towel before letting go of the trigger.

- Hold can 6 to 8 inches away from project.
- Maintain firm, even pressure on trigger, do not pump.
- In a slow, sweeping motion, spray thin layers of paint rather than saturating fabric all at once. Add multiple thin layers as needed for desired color.

- Let dry approximately one hour before wearing.
- Wait 72 hours to wash, no need to heat set. Do not use fabric softener. Tumble dry on low, turn inside out.

Simply Spray washes off hands with soap & water!

RE-USING & STORING CANS: Clean tip of nozzle between each use. Tip the can upside down and spray to clear nozzle and wipe off the outside. When not using paint or to store partially used cans, make sure the trigger is pushed out in the "off" position.

Blending colors with Simply Spray® Soft Fabric Paint:

One of the most unique things about Simply Spray is the ability to blend colors easily! Some of our favorite color combinations that blend well or work great together are:

- Brite Pink & Brite Yellow (makes a beautiful coral color)
- Blue Jay and Spring Green
- Deep Purple, Cranberry & Blue Jay
- Sky Blue, Lilac & Brite Pink
- Green Apple & Brite Yellow
- Brite Orange, Poppy Red & Brite Yellow
- Poppy Red & Blue Jay
- Spring Green & Green Apple

All colors work with black which gives depth to any project!

Note: Brite Orange works well with warm colors, but blending with green, blue or purple can create a brownish color.

**Try Stencil Spray
over a Simply Spray
tie dye technique!**

To make a Scrunch tie dye:

"Scrunch" the fabric with fingers.

Add more colors as desired.

Apply first color.

Easy tie dye effect in minutes!

To make a Spiral tie dye:

Pinch center of the shirt and twist, creating a loosely twisted "star" in the center of the shirt. Spray first color. Gently unfold shirt and repeat twist and spray with additional colors as desired.

For multiple spirals, make repeated, smaller twists all over shirt.

To use a Resist:

Using spray adhesive, lightly glue down foam cut-outs or any objects to areas that you want to resist a spray of color.
